

THE CARLISLE GROUP
An Executive Search & Recruitment Firm

Succession Planning & Career Pathing

As an organization, your goal should be to recruit and retain superior candidates and employees who are able to continuously develop within your company. In today's diverse and technology-driven business environment, career paths are no longer limited to climbing the proverbial ladder. A healthy career can move in many different directions -- straight up, at an angle or horizontally -- and still be considered successful.

Development

TCG's Succession Planning along with Career Pathing Strategies provide your organization with the tools you need to attract and retain top talent by giving your employees everything they need to not only be content, but inspired in the workplace.

We'll help you to define and reward performance; create a challenging, diverse and fun culture; work with your supervisors and managers to identify top talent and develop teams; and implement mentorships, job shadowing and more.

We know that Career Pathing is most effective when it is integrated into the overall talent management strategy. There should be alignment between titles, job responsibilities, competencies, demonstrated experiences, expectations, and quantifiable goals. We'll help you to direct employees toward the company's future goals and create friendly competition that will drive success.
